Our Heritage and Philosophy

At Vetrovia Ceramic, we believe that the spaces we inhabit are a reflection of our inner aspirations. Founded on the principles of aesthetic excellence and structural integrity, Vetrovia has emerged as a vanguard in the ceramic and porcelain industry. The name "Vetrovia" represents a journey—a path toward glass-like perfection and stone-like endurance. We started with a singular mission: to move beyond the functional utility of tiling and enter the realm of architectural art. Today, we stand as a global partner for architects, interior designers, and homeowners who refuse to compromise on the visual or the visceral.

NATURE'S
STONE
PERFECTED
THROUGH
HUMAN
CRAFT

Timeless ceramic design
shaped for modern living.

The ceramic product is a paradox: it is born from the softest mud, yet it ends as the hardest stone. It is fragile enough to shatter, yet durable enough to outlast civilizations. When you touch a ceramic surface, you are touching a material that has been perfected by fire to serve a lifetime of human needs.

Our premium porcelain tiles provide the perfect foundation for modern living, merging innovative industrial technology with breathtaking, high-definition natural designs

DROP DOWN TYPE	COUNTERTOP TYPE	DIMENSION

Available all basin in five size with 15 mm thickness

540X800 MM , 540X1200 MM , 540X1800MM

Available all basin in three shape capsule , rectangular , elliptical

Dropdown Vs Counter Top Customization

DROP DOWN

>>> For a classic and highly practical vanity setup, the Drop-in Basin offers a refined, low-profile silhouette. This design features a subtle rim that rests directly on the countertop, creating a clean frame around the washing area.

It is the ideal choice for high-traffic bathrooms where efficiency is key. The self-rimming edge provides an extra layer of protection for the countertop cutout, ensuring that water is contained within the bowl. This customization is incredibly versatile, working seamlessly with any surface material from natural stone to laminate, offering a timeless look with effortless maintenance. <<<

COUNTER TOP

>>> For those looking to create a dramatic architectural statement, our Countertop Basins elevate the sink into a stunning focal point. By sitting entirely above the surface, this design showcases the material and shape of the basin as a piece of art.

This customization is perfect for modern, spa-like master suites. It maximizes the storage space inside the cabinet below by keeping the basin depth above the counter line. Whether you choose a minimalist rectangular shape or a soft organic curve, the countertop basin provides a luxurious, high-end aesthetic that defines the character of the entire bathroom. <<<

Key Features And Specifications

Our Products

Hygienic Surface :

The surface is exceptionally smooth and non-porous, preventing the buildup of dirt, bacteria, mold, and mildew. This makes it incredibly easy to clean and maintains a highly sanitary environment.

Scratch & Abrasion Resistance :

Engineered to withstand daily wear and tear, the surface is highly resistant to physical friction. It will not easily scratch, scuff, or lose its finish when exposed to sharp objects or abrasive materials.

Chemical Resistance :

The material is structurally inert and will not degrade, react, or discolor when exposed to harsh household chemicals, bathroom cleaners, mild acids, or alkaline substances.

Heavy Duty :

Built with high structural density, this product boasts exceptional load-bearing capacity and impact strength. It is designed to handle significant weight and physical stress without cracking or breaking.

UV & Heat Resistance :

The finish is highly stable under extreme conditions. It will not fade, yellow, or deteriorate when exposed to direct sunlight (UV rays), and it remains unaffected by exposure to high temperatures or thermal shock.

Stain Resistance :

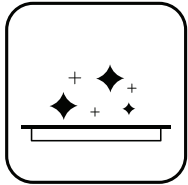

The dense surface repels liquids and prevents spills from penetrating the material. Common household items, cosmetics, and hard water will not leave permanent marks or discoloration, allowing for effortless maintenance.

Frost Resistance :

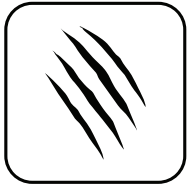

Due to its extremely low water absorption rate, the material will not expand or crack in freezing weather conditions. This makes it highly durable and suitable for environments with drastic temperature drops.

Dimensional Stability :

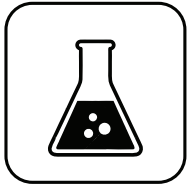

The product is manufactured to retain its exact original shape, size, and flatness over its lifespan. It resists warping, expanding, or contracting, even under fluctuating environmental conditions like changes in humidity or temperature.

Technical Specification of vetrovia ceramic

CHARACTERISTIC	STANDARD AS PER ISO-13006/ EN14411 GROUP B la	MEAN VALUE
REGULATORY PROPERTIES		
Deviation in length & width	±0.5%	±0.1%
Deviation in thickness	±5.0%	4.0%
Straightness in side	±0.5%	±0.1%
Rectangularity	±0.5%	±0.1%
Surface flatness	±0.5%	±0.2%
Surface quality	Min. 95% defect free	>95%
Colour difference	Unaltered	Unaltered
Glossiness	> 90 GU	>90 GU
STRUCTURAL PROPERTIES		
Water absorption	<0.50%	<0.05%
Apparent density	>2.0 g/cc	>2.20 g/cc
MASSIVE MECHANICAL PROPERTIES		
Modulus of rupture	35 N/mm2	>40 N/mm2
Breaking strength	> 1300 N	> 1800 N
Impact resistance (COR)	>0.55	>0.55
SURFACE MECHANICAL PROPERTIES		
Surface abrasion resistance	Declared class	Class PEI 3
Surface scratch hardness (Mohs scale)	5	5
THERMO HYGROMETRIC PROPERTIES		
Frost resistance	Test passed in accordance with test method	pass
Thermal shock resistance	Min. 10 cycle	pass
Moisture expansion	0.06mm/m	0.01mm/m
Thermal expansion (COE)	Max. 9.0 x 10	Max 6.5 x 10
Crazing resistance	No damage	No damage
CHEMICAL PROPERTIES		
Chemical resistance	No damage	No damage
Stain resistance	Min. Class 3	Class 5
SEFETY PROPERTIES		
Slip resistance (COF)	Declared value	>0.40 dry, <0.40 wet
Reaction to fire	Class A1 or A1 fl	Class A1-A1 fl
